

Remotes in git

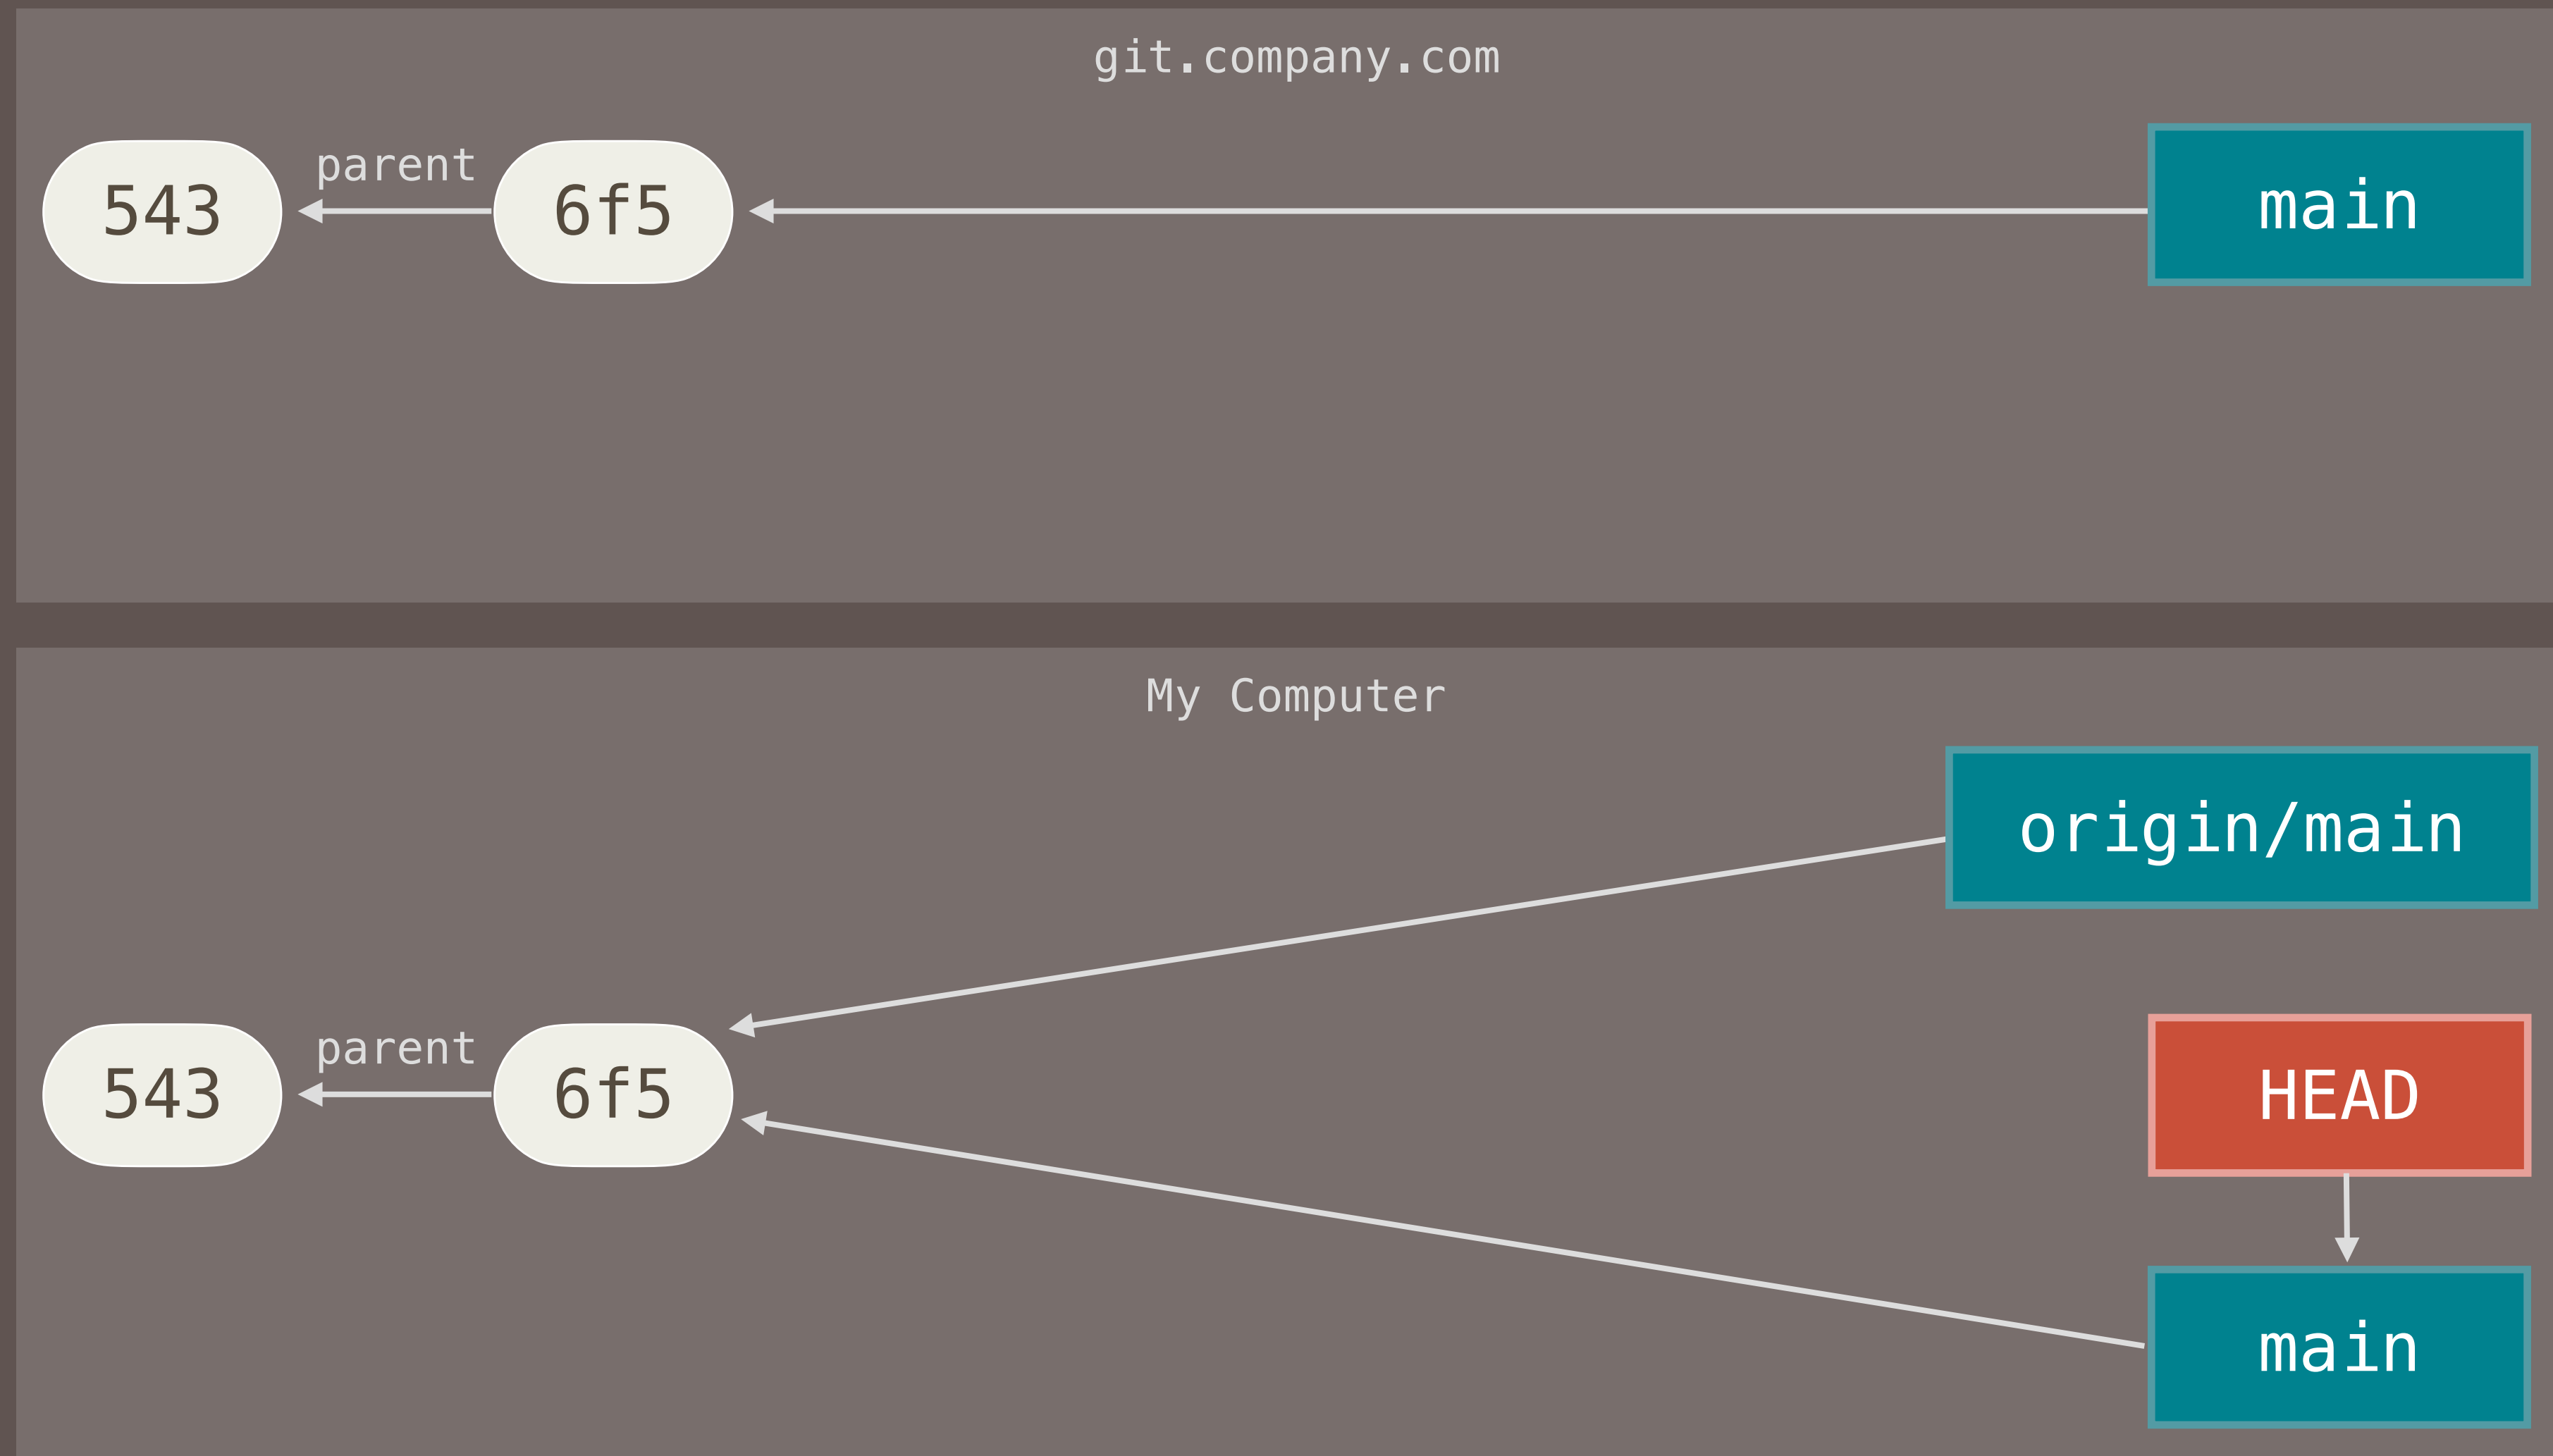

```
~ git clone me@git.gompany.com:project
```

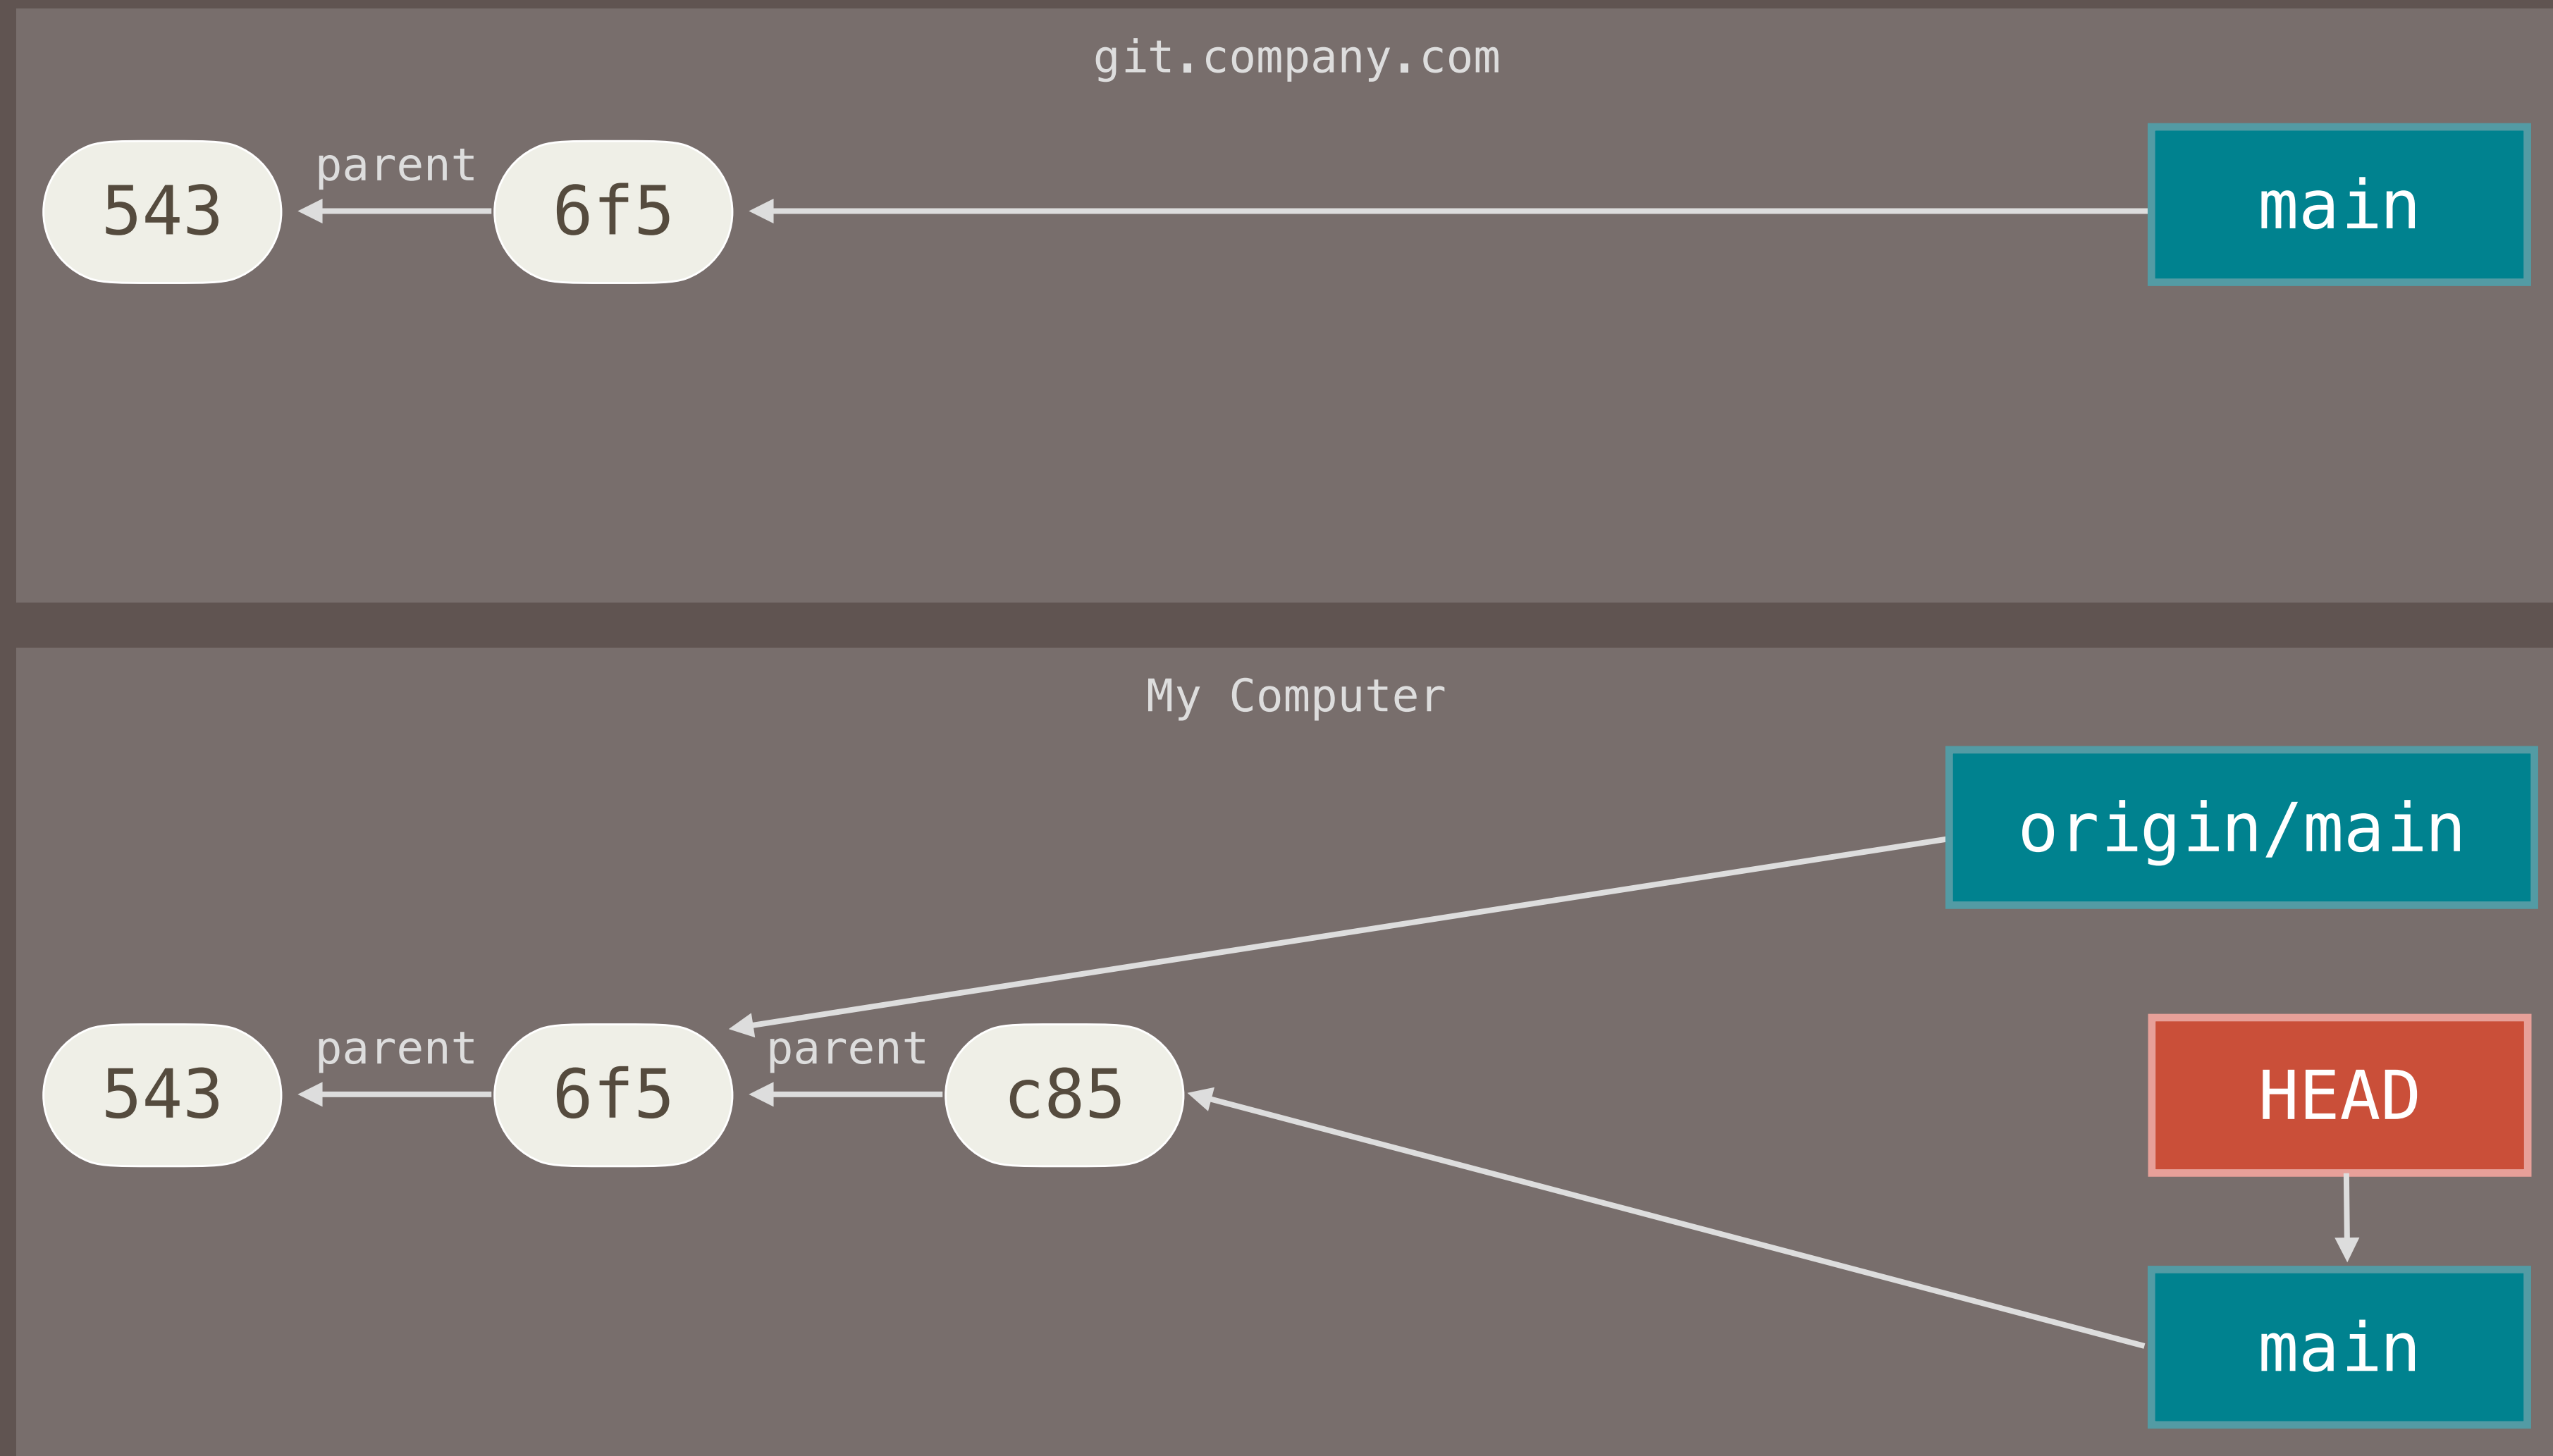

```
~git clone me@git.gompany.com:project  
~/project
```

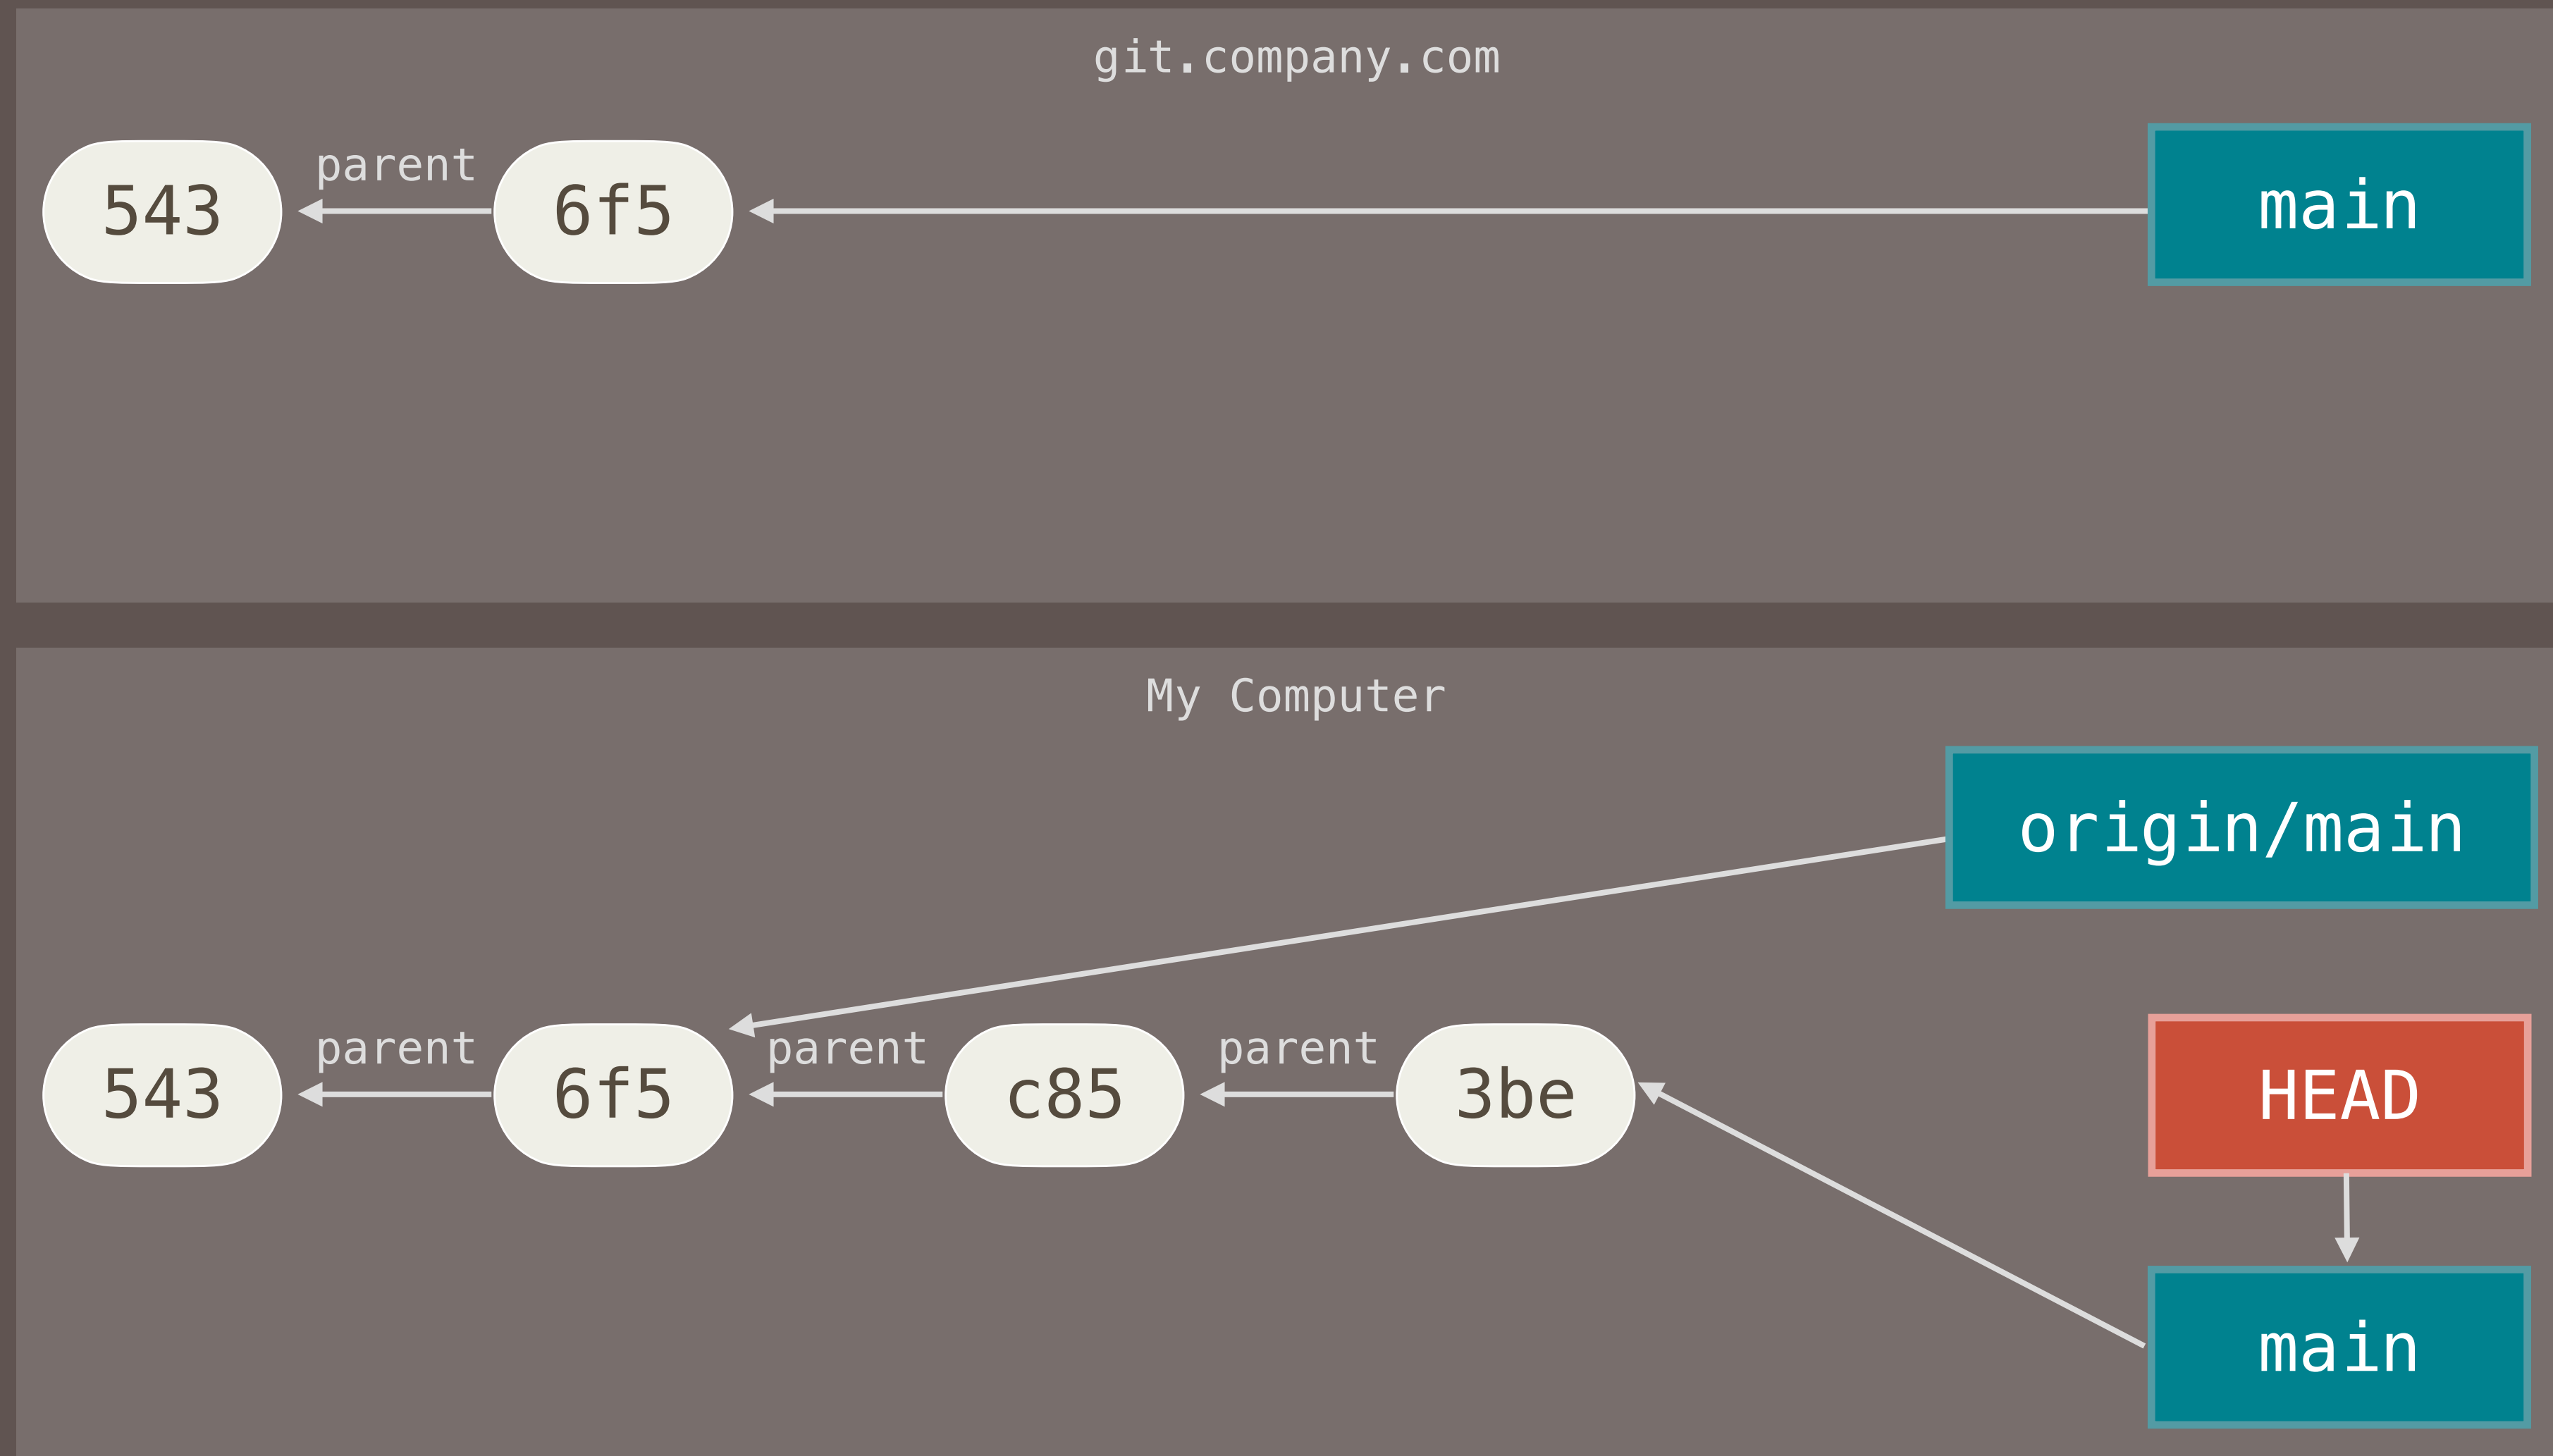

```
~/project git add  
~/project git commit
```

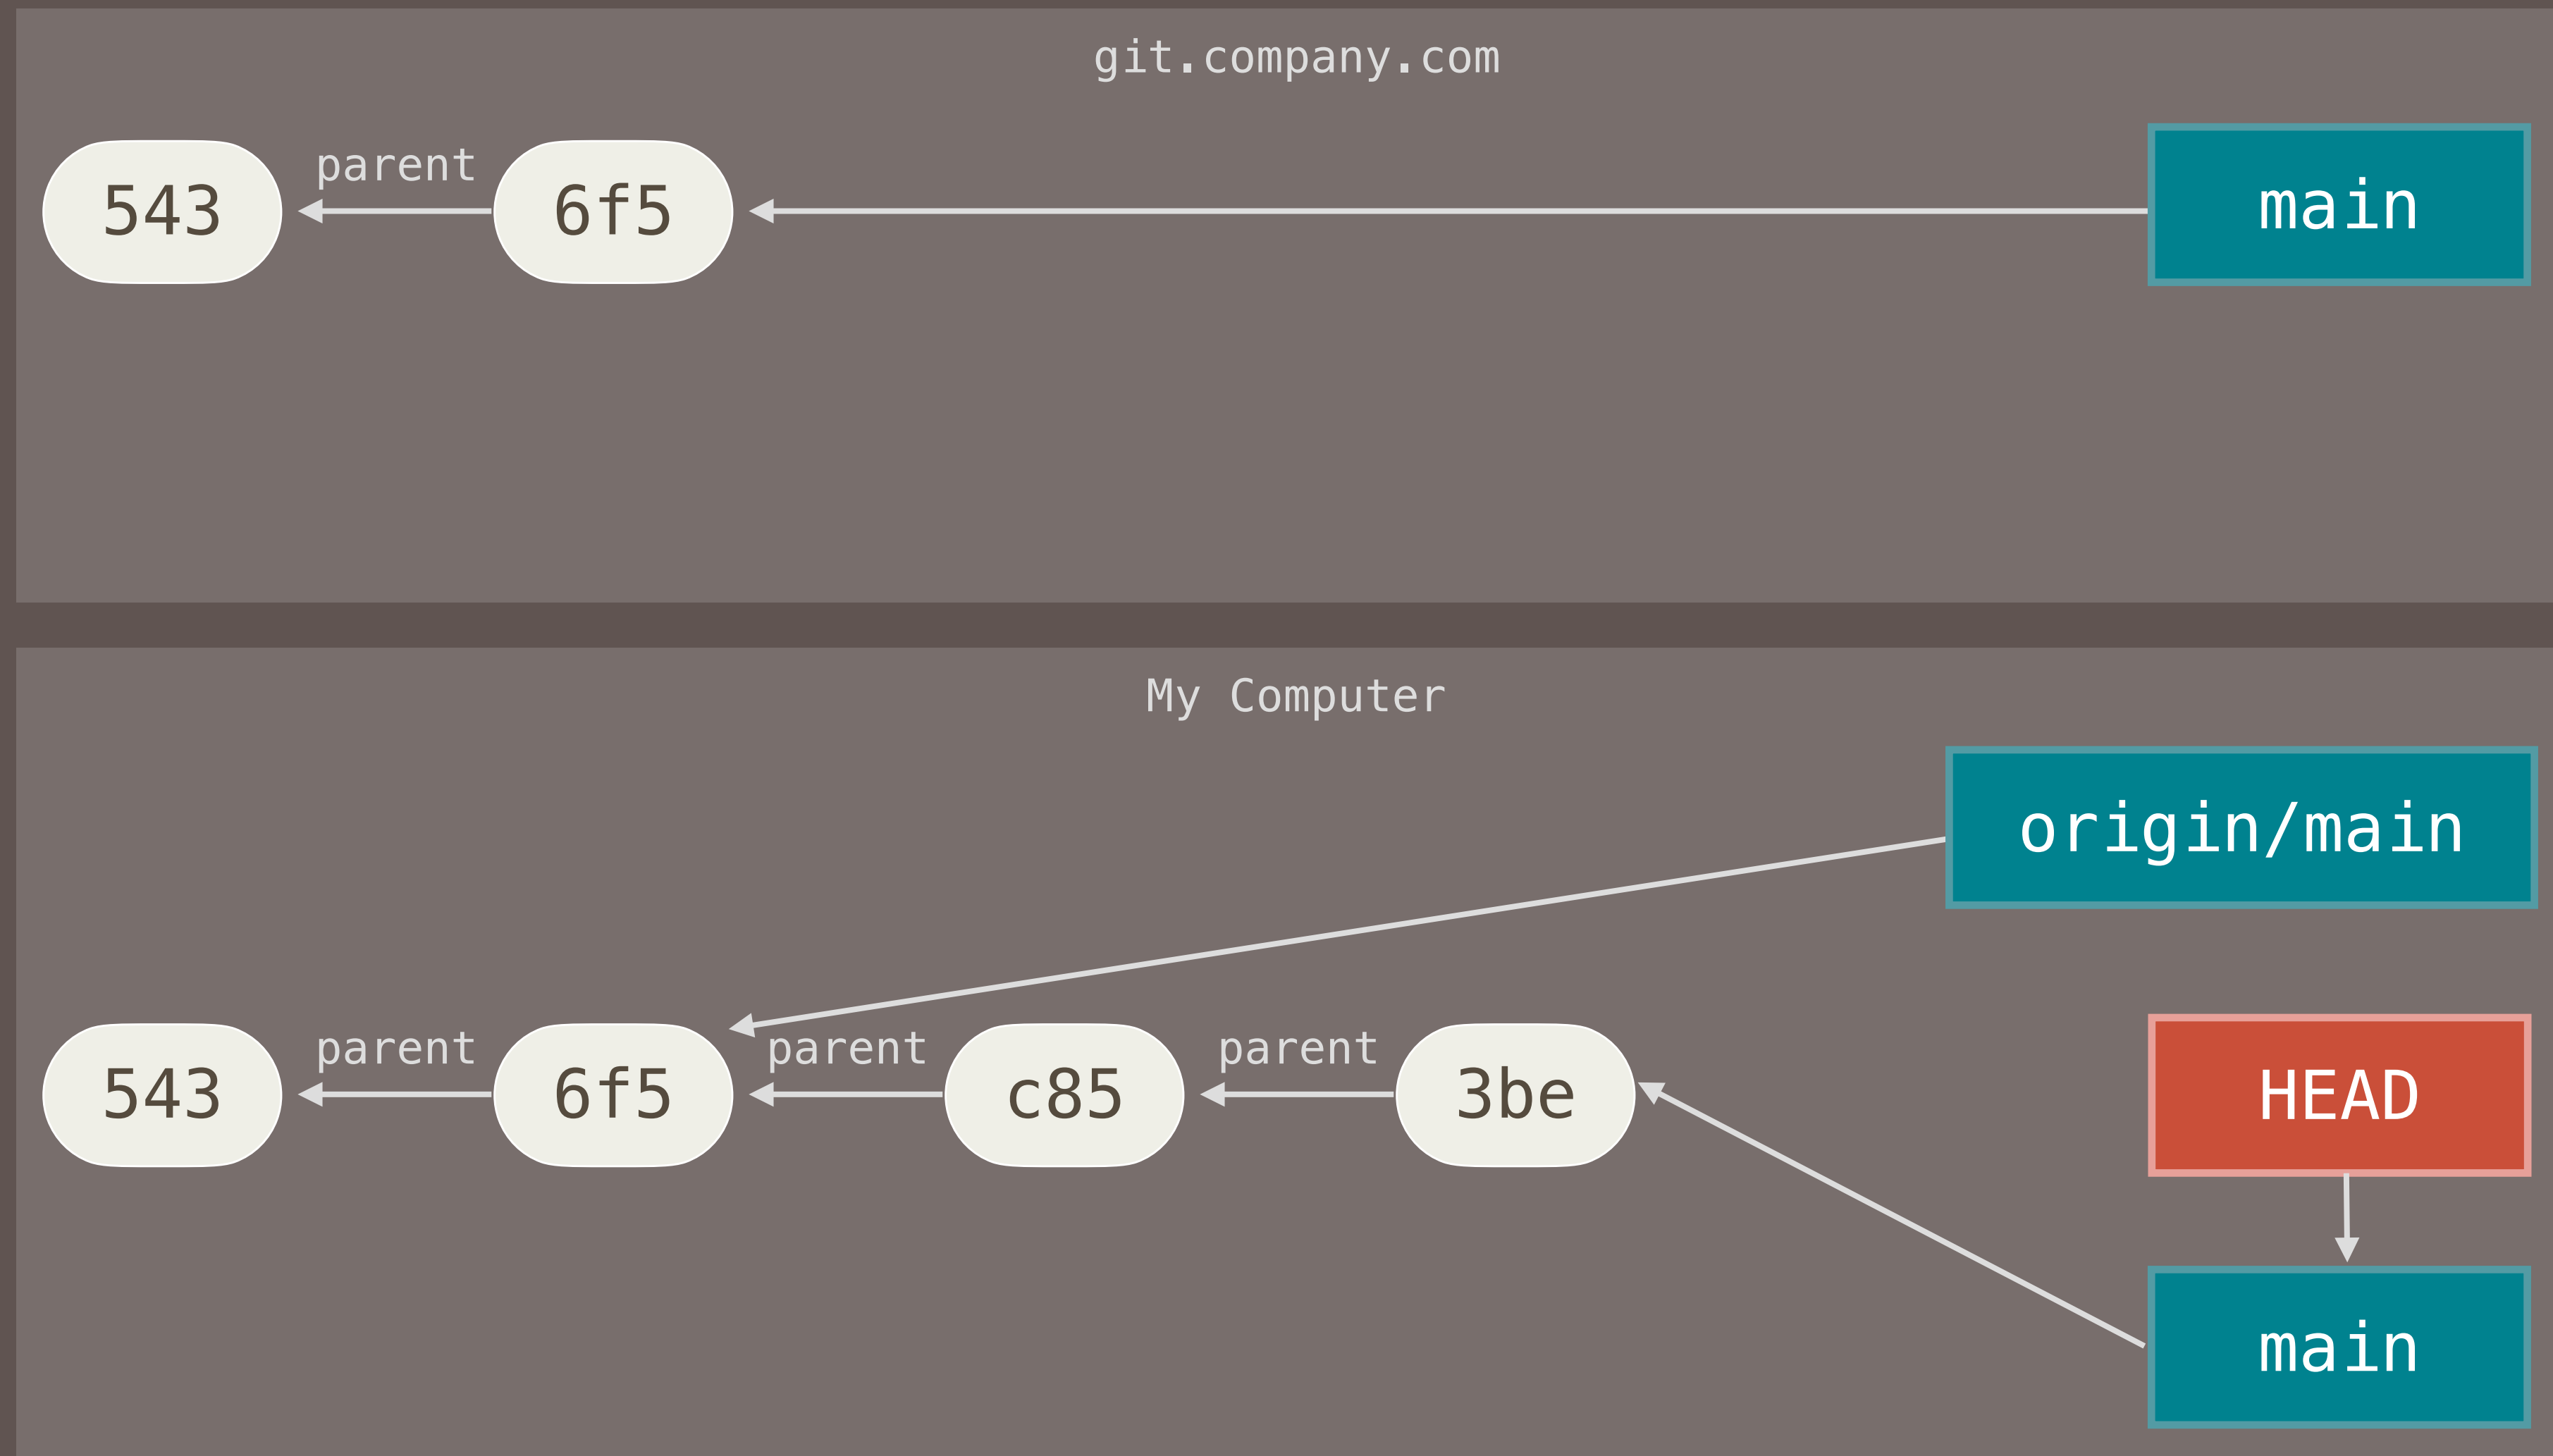

```
~/project git add  
~/project git commit  
~/project
```

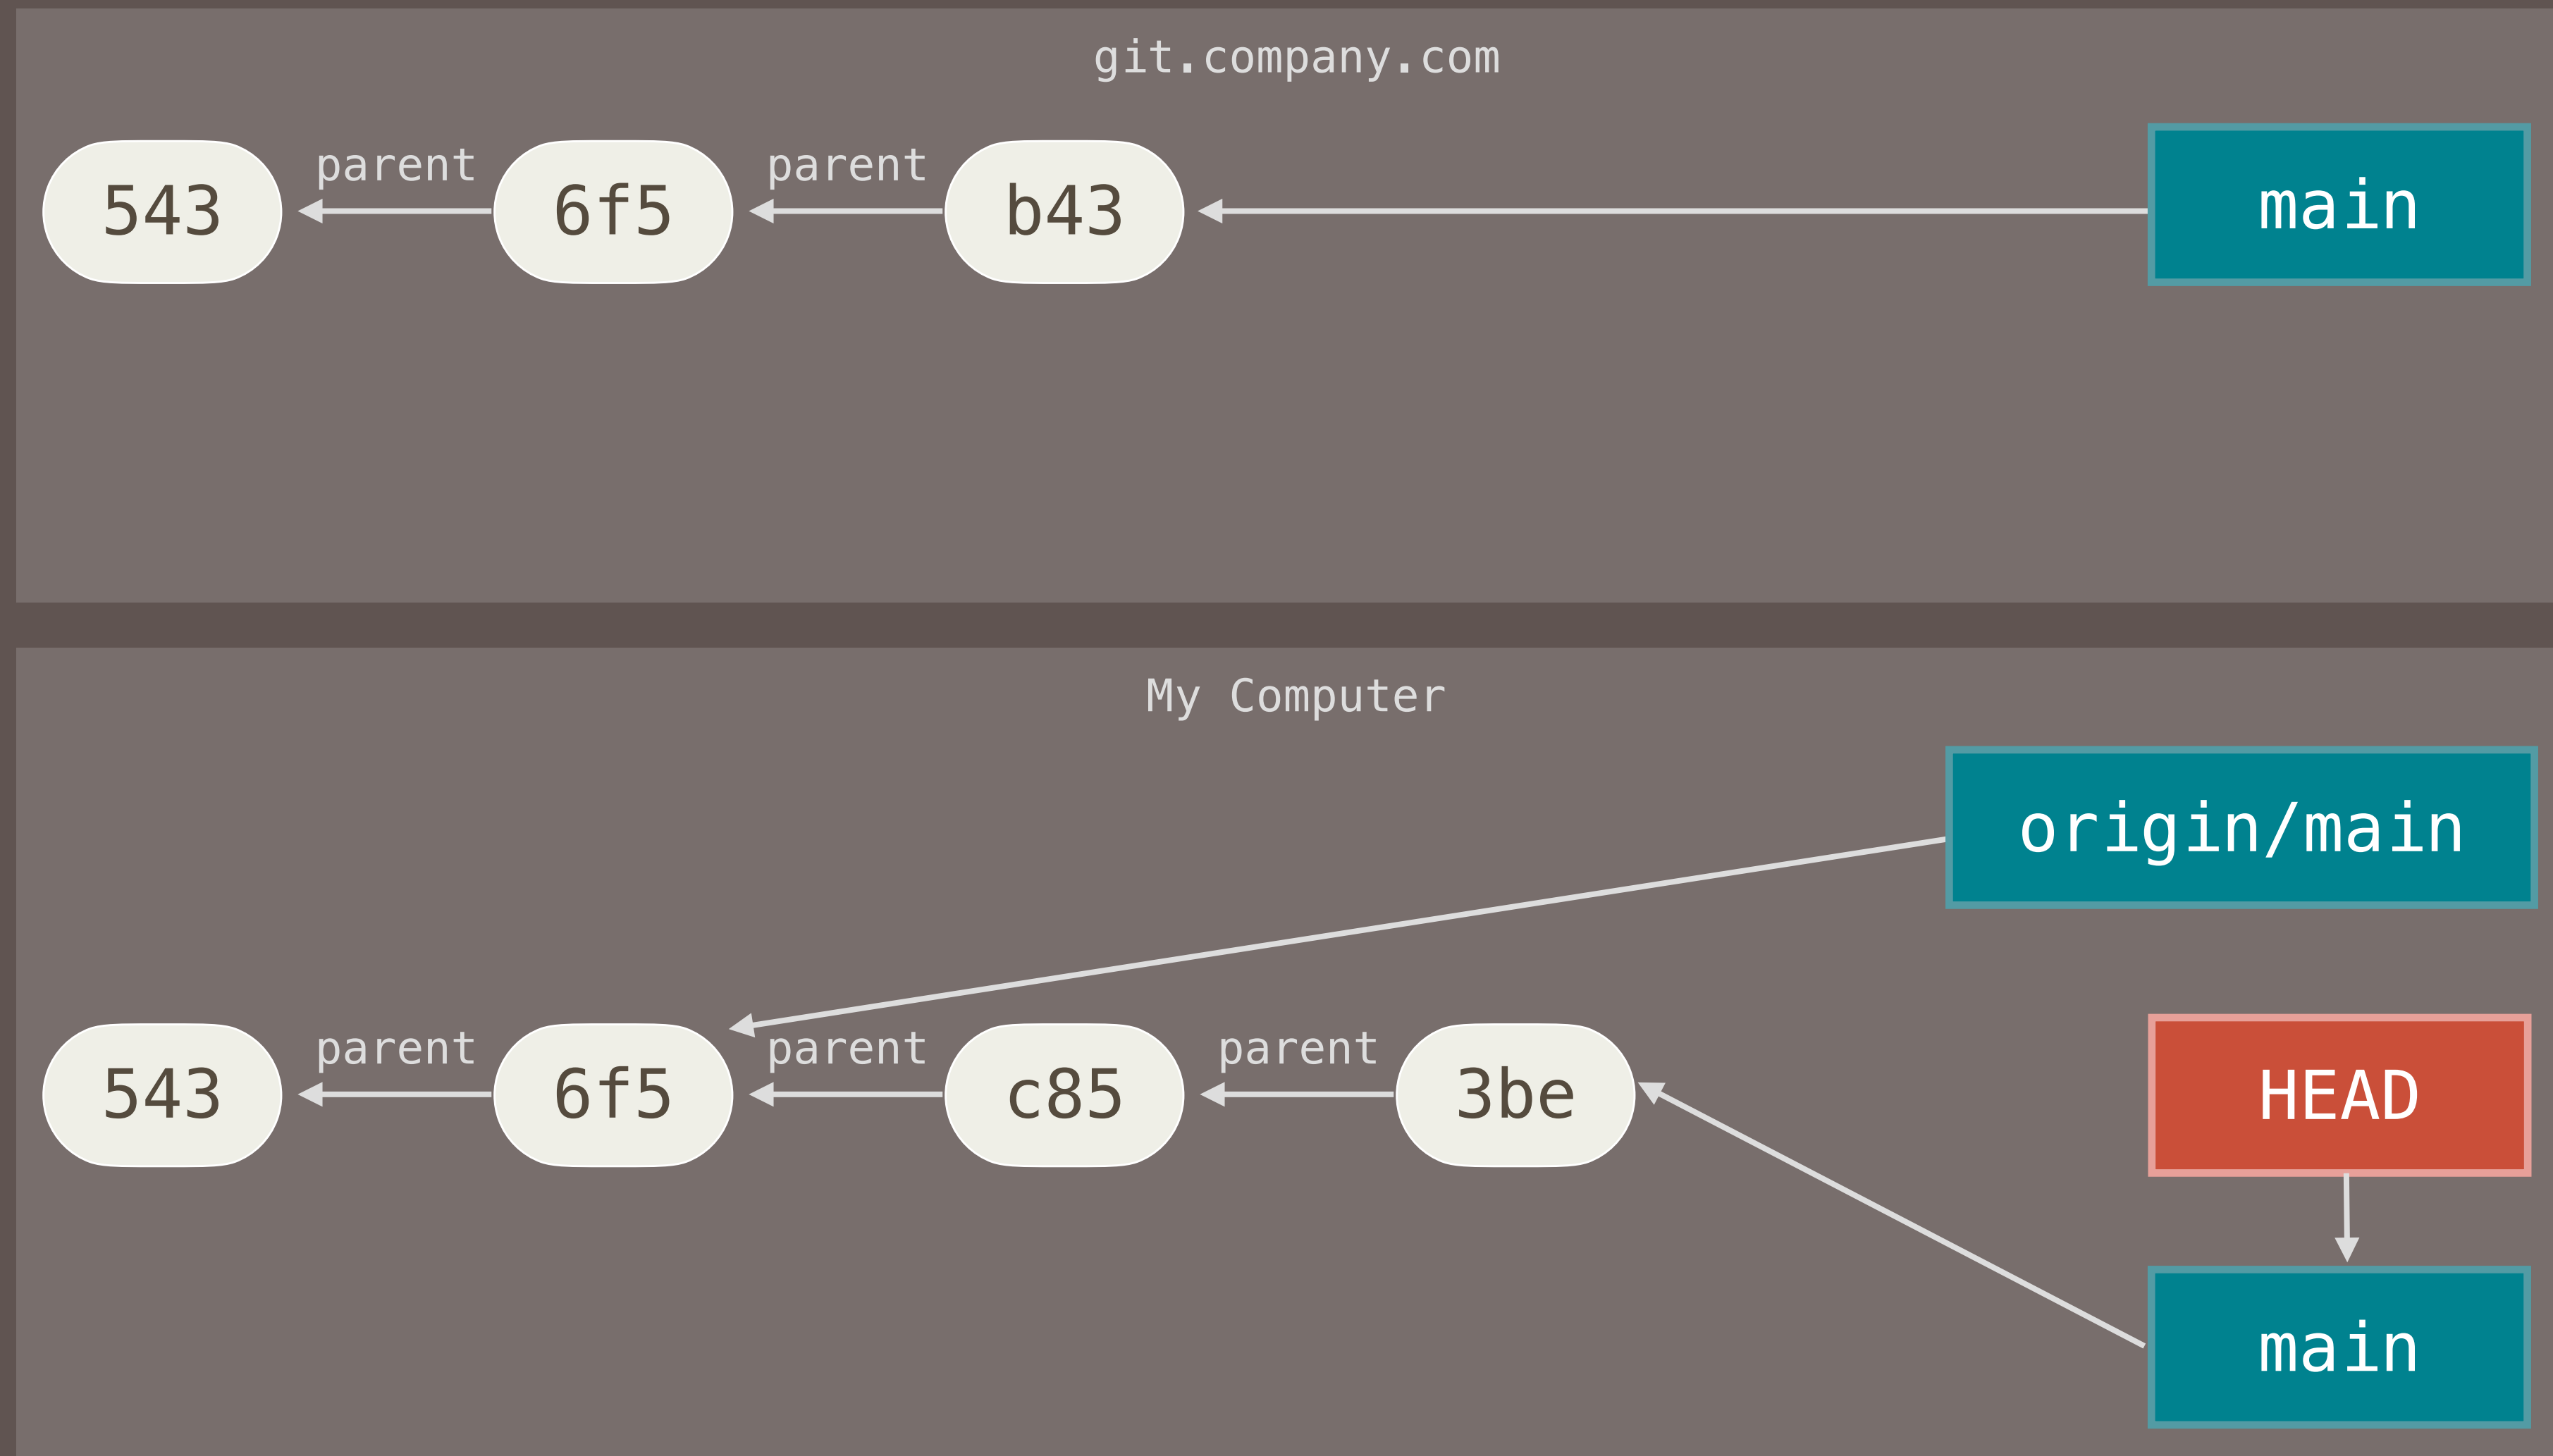

```
~/project git add  
~/project git commit  
~/project
```

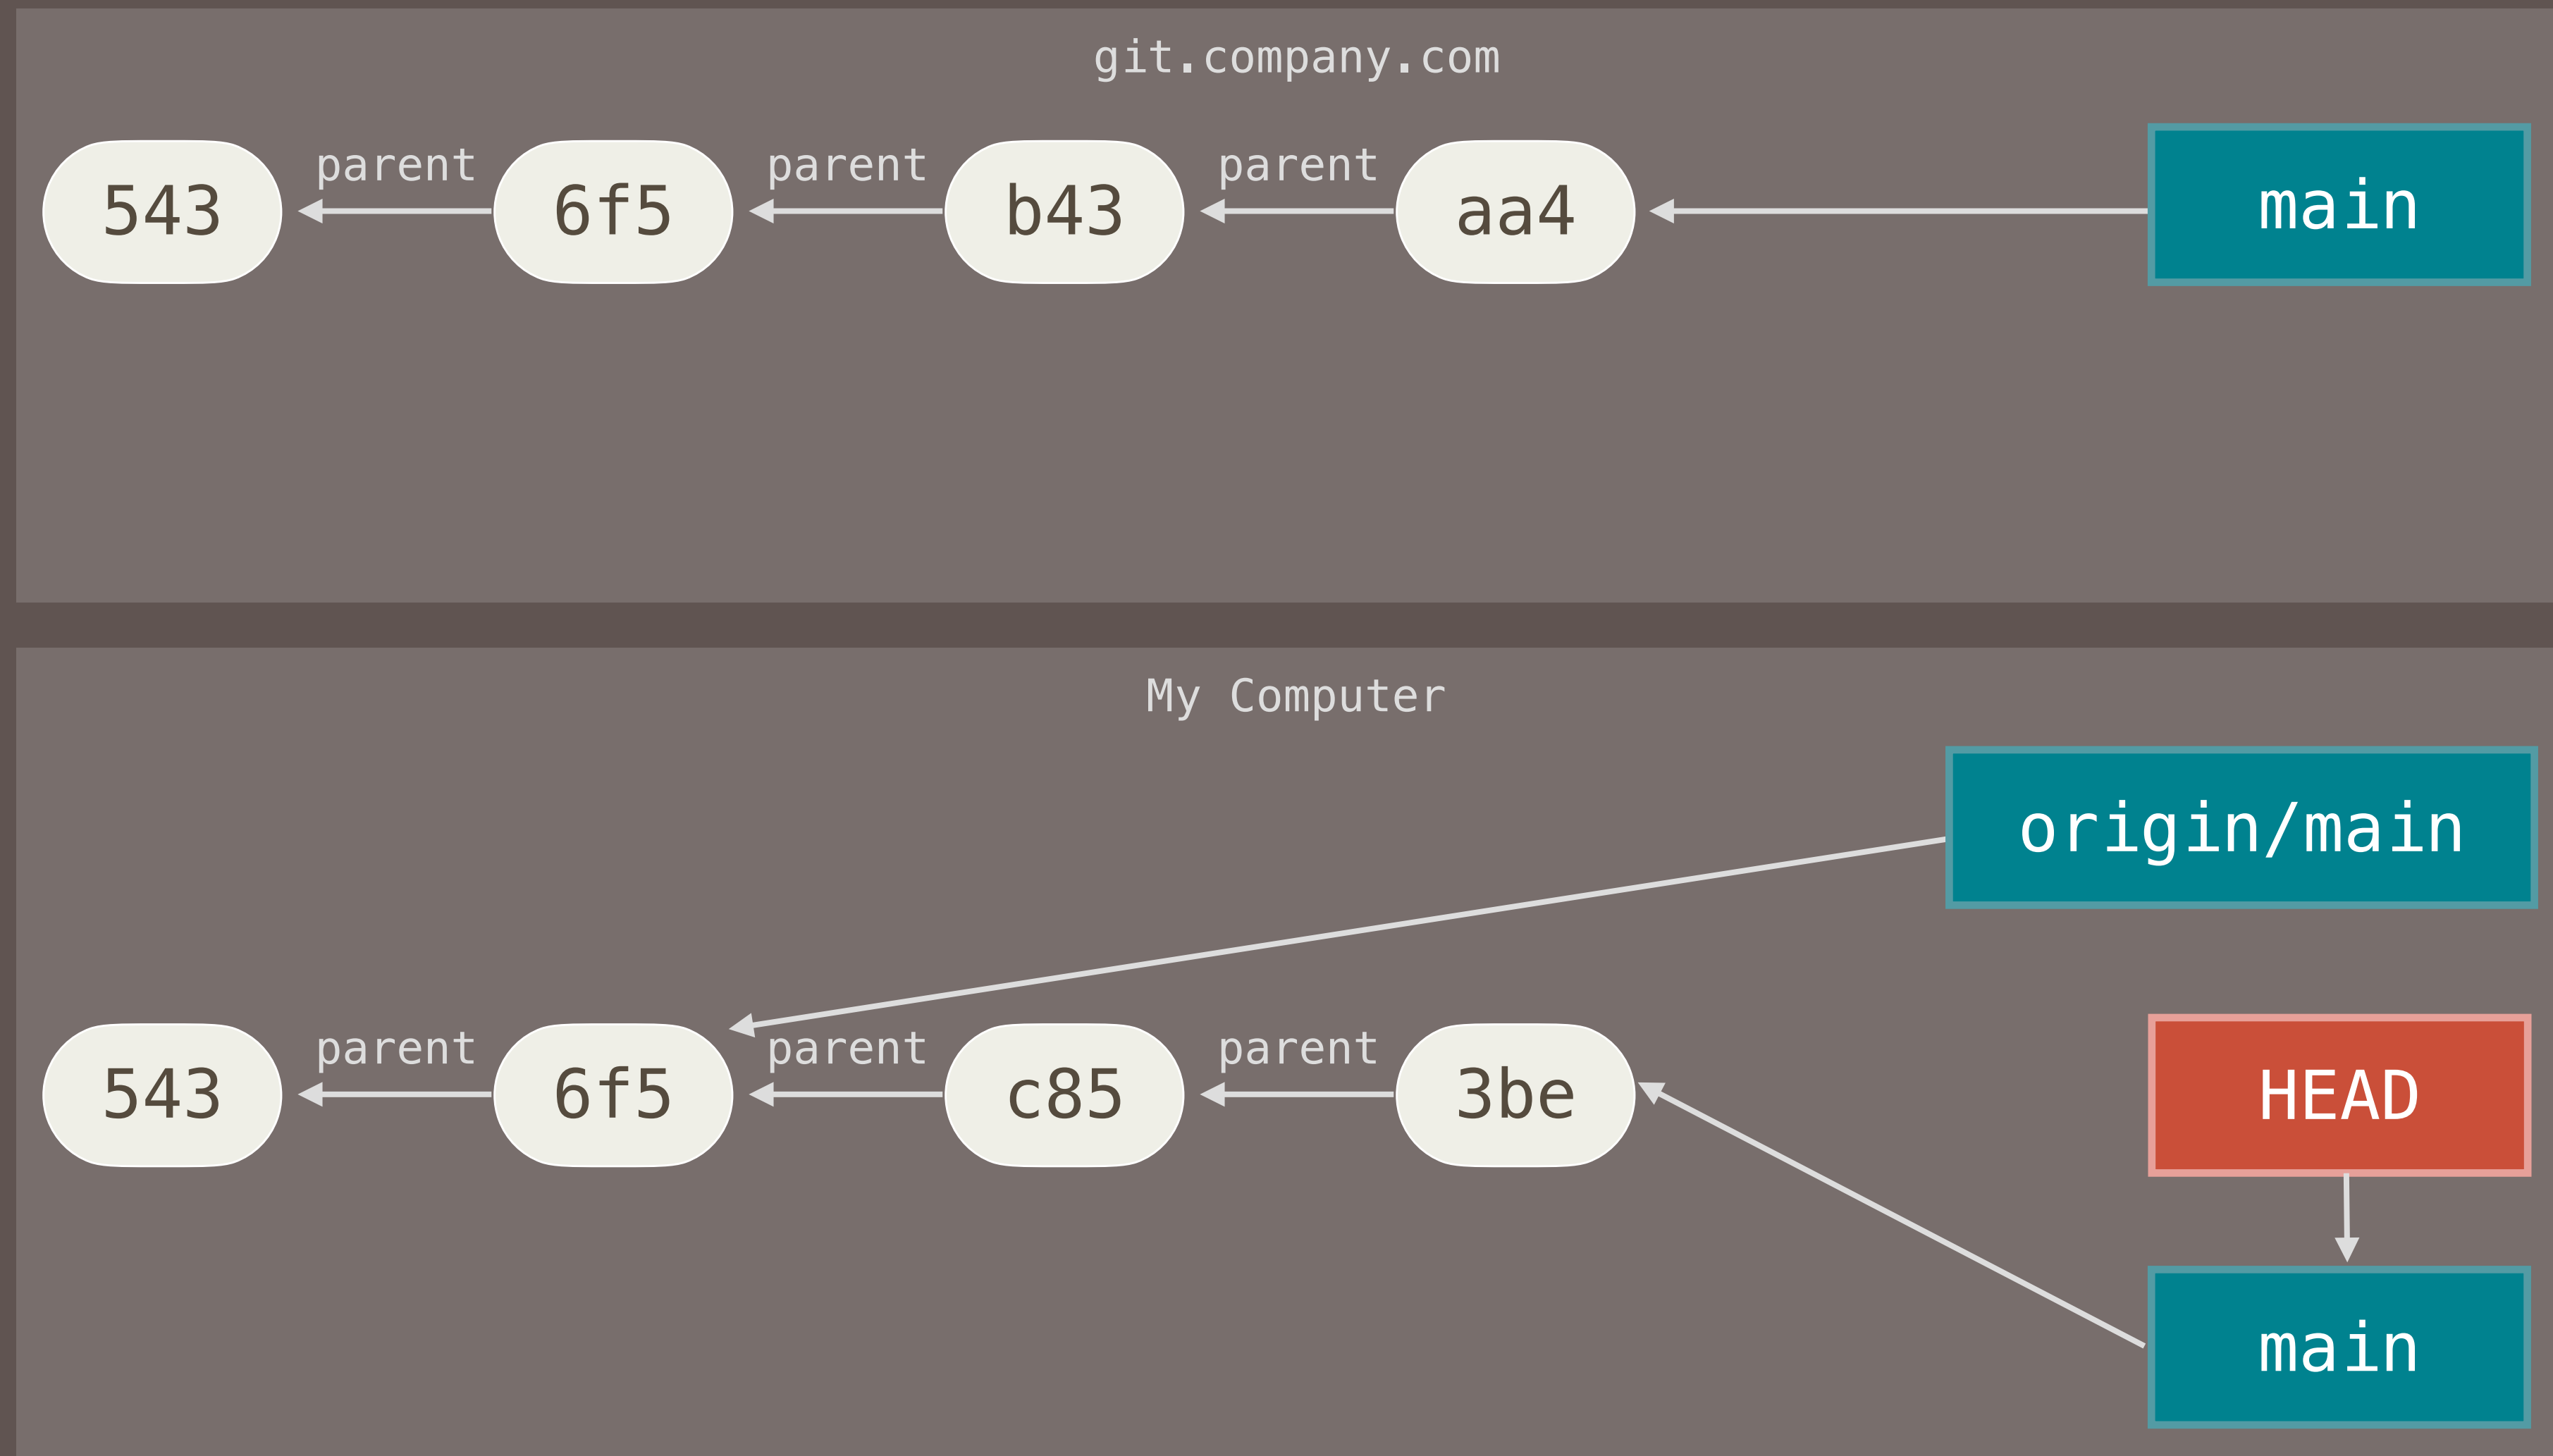

Jemand anderes arbeitet parallel und aktualisiert das Remote Repository vor uns
